

I Love London

Tommy Page

A beautiful night is not a beautiful night
Another night without you
I felt that way on a beautiful day
So far away from you I was walking sadly in Hyde Park
And you were on my mind
I said to myself if you were only here
We'd have the best of time I love London, you would too
There's nothing in the world
That can lift you up
Like a London night can do I love London, you would too
There's something in the air
That I'd love to share
A London night with you A special place in another world
A place you'd want to be
On a summer night or on any night
A place you've got to see On a London night at the stroke of midnight
I could hear old Big Ben chime
If only you could be here too
We'd have the best of times I love London, you would too
There's nothing in the world
That can lift you up
Like a London night can do I love London, you would too
There's something in the air
That I'd love to share
A London night with you I love London, you would too
There's something in the air
That I'd love to share
A London night with you
