

Too Early for the Sun

Kenny Loggins

I have never known a love, like this before in my life
Tears can turn into bliss with only a kiss, only a kiss
And I have never held a girl, like you so close in my arms
You appeared in my world and offered me hope for one more time I've never been so afraid that love is just a
dream

Darlin' I'll awake and you'll be gone
Never believe that I could love somebody
Oh, I could love somebody, someone like you
(Never in my life)

Oh, I could love somebody
(I love, I love, I love your love in my life)
Oh, I could love somebody, someone like you
(Oh, I love, I love, I love you) You're too early for the sun, too early for the moon
Too early for the rain comin' down on me
You make me feel so close to home

So far away, like nowhere else I've ever been You're too early for the stars, too early for the wind
Too early for my heart, to open up again
But when I see you I just laugh

And I believe, I'm right where I'm supposed to be I have never known a life like this except in my dreams
One kiss and I rose anew, now I'm alive, I have survived
I have never loved a girl like you except in my dreams
All my songs are for you, I finally see my dreams come true I've never been so afraid that love is just a dream

Darlin' I'll awake and you'll be gone
Never believe that I could love somebody
Oh, I could love somebody, someone like you
(Never in my life)

Oh, I love somebody
(I love, I love, I love your love in my life)
Oh, I love somebody, someone like you
(Never in my life)

Oh, I could love somebody, someone like you
(I love, I love, I love your love in my life)
Never in my wildest dreams

(Oh, I love, I love, I love you) You're too early for the sun, too early for the moon
Too early for the rain comin' down on me
You make me feel so close to home

But so far away, like nowhere else I've ever been You're just too early for the stars, too early for the wind
Too early for my heart, to open up again
But when I see you I just laugh

And I believe, I'm right where I'm supposed to be
Ooh my darlin, welcome to the wind
As we sail our ship of dreams into uncharted waters
Were guided by the stars and love will lead the heart
So girl, let's ride the wind
Surrender to the sun, surrender to the moon
Surrender to the rain, surrender to the stars
Surrender to your heart, surrender to the wind
Take a chance, open up, let love begin
Surrender to the sun, surrender to the moon
Surrender to the rain, surrender to the stars
Surrender to your fears, surrender to your tears
Take a chance, open up, let love begin
Surrender to love, surrender to love, once again
Surrender to love, surrender to love, once again
Surrender to love, surrender to love, once again
Surrender to love, surrender to love, once again
