The Plumb Song

Snow

Someone pass me that guitar
I wanna know if you can spare few minutes of your time
You know all this chop and chipin' chugglin' all around down the world
Heart ake to be broke but we're gonna write something nice
And smooth check it
La, la, la, la, la, la, la, la, la, la, la, la, la
La, la, la, la, la, la, la, la, la, la, la, la, la
As I travel down life's highways thinking of days gone by
I'm a city man but my heart keeps yearning
For some secluded countryside in a place where no one's a stranger
Say hello and how are you, let the music play
And in the middle of the day smell the sweet morning dew
La, la, la, la, la, la, la, la, la, la, la
La, la, la, la, la, la, la, la, la, la, la
There's no place that seems too far, not on earth or amongst the stars
I just close my eyes and I dream, if I can't reach it by motor car
Sit on top of the highest mountain, feel I can touch the sky
Then imagine I was a bird and I would spread my wings and fly
High, high over the moon, around the stars
And back to earth to you
Fall, fall follow me through around the world
And back then over the moon
High, high over the moon, around the stars
And back to earth to you
Fall, fall follow me through around the world
And back then over the moon
As I often look to the sun, as it meets the rising shore
Seems I know this taste an unfamiliar place
But that face I've seen before April showers bring May flowers
So let the rains come down
Will all this end? Well that all depends
I wish my friends could see me now
High, high over the moon, around the stars
And back to earth to you
Fall, fall follow me through around the world
And back then over the moon
High, high over the moon, around the stars
And back to earth to you
Fall, fall follow me through around the world

And back then over the moon
Tell it to me, tell it to me, tell it to me Lord
Tell it to me, tell it to me, tell it to me Lord
Tell it to me, tell it to me, tell it to me Lord
Tell it to me, tell it to me, tell it to me Lord
See then we come and we say come and a wan des a way
And then we say de, de come come de, de yesterday
And you see that you just want to lay
Informer you no say daddy down a lickity boom boom down
See then we're talking 'bout the mind that's on the moon
See then we're talking 'bout the mind that's on the moon
See then we're talking 'bout the mind that's on the moon
And da mind on da moon a da mind de le fi fe want to say
And the mind on the moon de la fee fee de la new come say
La, la, la, la, la, la, la, la, la, la, la, la, la, la, la, la, la, la, la
La, la, la, la, la, la, la, la, la, la, la, la, la, la, la, la, la, la, la
And l wish my friends could see me now
