# Slow Down

## Matthew Heath & Grady Griggs

Moving to my own drum
Leave before the sun comes
I was gonna make this count
Bleeding for the sake of
Someone else's paystub
Hoping this would all work out

But I've been stealing time
Thinking if I tried
Everything would turn out right
We're caught up in the climb
Love was far behind
Someone's gotta stop this madness

When all this seems like it's OK
And all we feel is day to day, we're on replay
And all these dreams in life's way
I'll leave them up to people that we love
So slow down
We need to slow down

Feeling when the sun comes
Feeling when your heart turns
Everybody needs more time
To step into the sunshine
See it with your own eyes
I just want to feel alive

Cause I've been killing time
I was losing life
I've been here for no good reason
We're caught up in the climb
Love was far behind
Someone's gotta stop this madness

When all this seems like it's OK
And all we feel is day to day, we're on replay
And all these dreams in life's way
I'll leave them up to people that we love
So slow down

We need to slow down

No one's got a hold on time
We just gotta spend it right
No one's got a hold on you
As long as you're still alive

No one's got a hold on time
We just gotta spend it right
No one's got a hold on you
As long as you're still alive

When all this seems like it's OK
And all we feel is day to day, we're on replay
And all these dreams in life's way
I'll leave them up to people that we love
So slow down
We need to slow down
