

# Snapshot

## Atmosphere

Here and there, everywhere  
The places that I go people stop and they stare  
I'm beautiful that I know  
I am quite a sight to behold  
Hey now, hey now, now  
I want you to remember me being who I wanna be  
Hey now, hey now, now  
Turn it on then you'll see everybody look at me  
Snapshot  
Take my picture snapshot  
Let me show what I got  
Red hot  
Take my picture red hot  
Take it over the top  
Photograph, video  
Catch me while you can 'cause I gotta go  
Hollywood, sunset strip

Living in the spotlight can be such a trip  
Hey now, hey now, now  
Take it on my good side, don't wanna be on my bad side  
Hey now, hey now, now  
I ain't never been shy, ain't got nothin' to hide  
Snapshot  
Take my picture snapshot  
Let me show what I got  
Red hot  
Take my picture red hot  
Take it over the top  
Say baby, uh, you got some film in that camera  
Or are you just happy to see me?  
Hey now, hey now, now, click, click  
Hey now, hey now, now, click, click
