

When I Call On You

[Dee Clark](#)

When the stars shine at night
I see your face in their twinkling light
I hear your voice like the breeze in the trees
That's when I call on you
And when the moon fades away out of sight
And the breeze seems to whisper to me
That you are my only light
That's when I call on you
That's when I call on you
That's when I call on you
When I wondering if you're thinking of me too
That when I call on you
