

Embers

Band of Skulls

Take me to the place that we met, babe mmm
We could even go back some more
Not a single thing to regret, babe mmm
That you are them all yeah It's not what you waited for
Or hated for
Awaited through the night
But I still love you, baby Now, I don't even want to remember mmm
But I better do unless you forget
As the fire returns to an ember mmm
That you won't get yeah It's not what you waited for
Or hated for
Awaited through the night
All that you meant to me
Was misery
I wasted half of my life
Take all your trophies down
Take off your crown
I still love you, baby
