CONCEIVED

Alienxss

Want to keep your dream alive?
Can I keep it with mine?
But I'm no good for you
I suppose when you get a cold idea
You still hold me close at night
Never liked you any less
And the world's not such a friendly place, is it?
It can grow very cold, very quickly
And for a very long time
If the sun with some twist of fate, starts giving out it's shine
Some of the time the future comes right 'round to haunt me
Some of the time the future comes 'round just to see
That all is as it could be
Like it's there to remind me
We've got to wait and see
Can I still be conceived in a loveless embrace?
Still we learn to be a warm sun

Around a very cold galaxy
It's just like you said it could be
Oh, it's like you said it would be
Some of the time the future comes right 'round to haunt me
Some of the time the future comes 'round just to see
That all is as it should be
Like it's there to remind me
We've got to let it be, yeah
Some of the time the future comes right 'round to haunt me
Some of the time the future comes 'round just to see
That all is as it could be
And it's there to remind me
We've got to wait and see
We've got to let it be, yeah
Wait and see, wait and see
Yeah, yeah
