

I'm With You

The Ponys

Are you afraid to go outside?
Are you afraid of what you might find?
Baby girl, I, I understand it
I've seen it too and I don't recommend it
Are you afraid of what's been started?
Are you afraid to seem retarded
When you go outside and do the things you do?
Oh, and I don't mind what they say
They're probably alright in their own way
And I don't care what they do
As long as you're with me and I'm with you
You should take a look into the eyes of your friends
Maybe you'd realize then
You should get used to being alone
Cause they're just looking out for themselves
And doing bad things for their health
Oh, you should go and just let them be
And you just let them be
And I don't mind what they say
They're probably alright in their own way
And I don't care what they do
As long as you're with me and I'm with you
