

# Eyes Wide Shut

## Hale

Eyes wide shut, stuck conscious

I can't sleep 'cause I'm with you

I can feel your skin go through my soul

While yours is somewhere elseBut you, you never saw me there with you

No you don't have a clueEyes wide shut, action cut

I can't sleep 'cause I'm with you

I can feel your skin go through my soul

While yours is somewhere elseBut you, you never saw me there with you

No you don't have a clueAll I have is all I need but all you want is all I'm not

And you can't see that all I'll be is someone who just loves you when you're thereAll eyes can see through

May you bet things can't go wrong while you're with meBut I lie\*\*All I have is all I need but all you want is all

I'm not

And you can't see that all I'll be is someone who just loves you when you're there
