Don't Look Down

Finger Eleven

It doesn't matter that the rain is gone
You know it's coming back
(Coming back)
Just as sure as the sun burns through
Until it burns out black
(Burns out black)
Don't let anything faze you know
That you've found your stride
Just when everything feels okay
Just as suddenly not quite
Don't look down, just close your eyes
And keep your head in the clouds
'Cause it's only a matter of time
Before you hit the ground
But until you fall
You're gonna have to live this out
I wouldn't focus on the negative
There's no point in that
(Point in that)
Nothing says you can't enjoy the ride
Even if you are off the tracks
Don't let anything bring you down
Keep on burning bright
Just when everything feels okay
Just as suddenly not quite
Don't look down, just close your eyes
And keep your head in the clouds
'Cause it's only a matter of time
Before you hit the ground
But until you fall
You're gonna have to live this out
Don't look down, close your eyes
And keep your head in the clouds
'Cause it's only a matter of time
Before you hit the ground
But until you fall
You're gonna have to live this out
