

Uphill Road (feat. Jung In)

Yoon Jong Shin

Our smiles will disappear now
Just look at this steep road
Yes, before we climb it
Let's remember each other's smiles

We might not see them for a while
Our gentle sloped path that we passed
was filled with sweet scents of love
Now there is sticky sweat and roughly exhaled breaths
That might be our only conversation

One step, now it's just one step
Don't look at that faint end
Like the flat road, keep looking at me
Then I can endure it

I love you, who is going on this path with me
You, who chose me, who is difficult
If the wind blows sometimes, look at the landscape faraway
Our path is as beautiful as much as we climbed up

Remember, even if we let go of our hands
Don't be alarmed and don't get lost
When we can't climb any further, the peak won't be too big
So we will meet again, if we climb up

One step, now it's just one step
Don't look at that faint end
Like the flat road, keep looking at me
Then I can endure it

I love you, who is going on this path with me
You, who chose me, who is difficult
If the wind blows sometimes, look at the landscape faraway
Our path is as beautiful as much as we climbed up

Remember, even if we let go of our hands
Don't be alarmed and don't get lost
When we can't climb any further, the peak won't be too big

So we will meet and shout out loud

I love you, till the end
