

# What Happened to America (feat. Colton Chapman)

## Hosier

What happened to America it used to be the land of the free  
What happened to America when all those jobs went over seas  
What happened to America fighting a war we don't need  
What happened to America it used to be the land of the free

[Verse]

What happened to America, if I remember it was united we stand  
We stand up for the land, we stood up for the boys in blue  
We held it down for all the troops, mad respect and my salute,  
Working that 9 to 5 in the morning lasing boots  
They feed us ammunition on the television  
Doctor's is feeding addiction's I'm painting you a picture with the lyrics  
Your hearing crooked politicians whose impositions is to  
Steal our livin', and I'll be damned if I ride for that  
Soldiers coming back from over sea's and they can't catch a break  
Business owner's passing at guys who may soon saquake  
Coming back with missing legs and have to fight to get a check  
Put their necks on the line for our freedom so they earned that  
Taxes us to the maximum ask them how they come up with that  
They sit back and laugh with their dress shoe's freshly waxed  
While we working in the mud, breaking backs in mother nature  
Realizing reality what happen to America

[Chorus]

What happened to America it used to be the land of the free  
What happened to America when all those jobs went over seas  
What happened to America fighting a war we don't need  
What happened to America it used to be the land of the free  
What happened to America...

[Verse]

If walls could talk in the white house  
They all be out doing their time getting their heads bounced  
All of them stealing our money, putting it in their bank accounts  
Acting like the country's broke but live in a million dollar house  
Ask me how, I don't know where they do that at  
Matter of fact doing it right here in our capital  
Actual everything is factual is the honest truth  
Worry about the President anyways he's a sitting puppet  
Like lil miss muppet ran by the hand like one of the muppets  
Get a grip on the country, our jobs are going over sea's  
Trump is in office about the 360 degree's

Racism will never stop unless we start talking about it  
United we stand, divided we fall, come together through the trouble times, in the gloomy weather we be better  
stronger than ever it's the United States  
In God we trust, and lives...

[Outro]

What happened to America it used to be the land of the free  
What happened to America all those jobs went over seas  
What happened to America fighting a war we don't need  
What happened to America it used to be the land of the free  
What happened to America...

What happened to America it used to be the land of the free  
What happened to America all those jobs went over seas  
What happened to America fighting a war we don't need  
What happened to America it used to be the land of the free  
What happened to America...
