

# San Francisco

## Ozone Mama

I heard a story 'bout a sacred place  
Where holy spirits get embraced  
Supersonic place to go  
(Where) Never born a sad end song Long long way from home With my soulmates (I) feel so down and insecure  
In a world fallen far from grace  
Gotta drop out and tune in and turn on  
Will they ever feel this way? The moment's come to show and tell  
With all you used to know so well  
Right here right now to testify  
Right here right now to prove me right To show you the way feel With my soulmates (I) feel so down and insecure  
In a world fallen far from grace  
All the diamonds we got buried in our debris  
(Are) longing for the great escape [Guitar Solo] With my soulmates (I) feel so down and insecure  
In a world fallen far from grace  
Gotta drop out and tune in and turn on  
Will they ever feel this way? With my soulmates (I) feel so down and insecure  
In a world fallen far from grace  
All the diamonds we got buried in our debris  
(Are) longing for the great escape With all our will we'll overcome spells of despair  
Strike on them with the wall of sound right through the air Reach out, dance on, verge of all out hell  
Destination: salvation, mushroom trip to San Francisco
