Alpha Centauri

Peter Ivers

ime warp space warp
Rockin in fury
Caught my darlin alpha centari
Circuling in systems searching a flurry
streamline gleaming alpha centari

Since ya been outta town
The machines broke down
Slippin way outta phase
Driften like is a way in days

Faster than like can skin a planet
Lost my life line I cant stand it
Radio scope reads medial story
Lost my baby alpha centari

Since you been outta town
the supplys all gone
you gotta come back with my energy pack intact

I cant survive amnother day without you
outter space is god damn cold without you
