

# Alpha Centauri

Peter Ivers

ime warp space warp  
Rockin in fury  
Caught my darlin alpha centari  
Circling in systems searching a flurry  
streamline gleaming alpha centari

Since ya been outta town  
The machines broke down  
Slippin way outta phase  
Driften like is a way in days

Faster than like can skin a planet  
Lost my life line I cant stand it  
Radio scope reads medial story  
Lost my baby alpha centari

Since you been outta town  
the supplys all gone  
you gotta come back with my energy pack intact

I cant survive amnother day without you  
outter space is god damn cold without you
