

# Strangers In Love

## Air Supply

Strangers in love  
Must a star fall from the sky  
It's stranger than most  
And stranger when we try To understand it all  
Why we fall  
As strangers in love  
Strangers in love Straight from the farm  
And a world apart and ready for  
Someone to take her arm  
She's never seen a movie  
What an innocent face  
What an innocent place It's natural, it's an easy thing to do  
Natural, it's an easy thing to do  
Strangers in love  
And a star fell from the sky Don't know which way to turn  
Don't know which boat to burn  
Don't know which way to turn  
Don't know which boat to burn Strangers in love  
Strangers in love  
Strangers in love  
...
