

# Bring Me To The Power

Yes

(anderson/howe)

This day began the matrix of the real world thinking

This way is meant to surface through the net

This train is set to mystify

This day began the history of the future

This train is set to justify

Whether you're ready or not

This day is of the meeting now

If they don't give us the keys

How are we supposed to get ready?

If they don't give us the keys

How are we to survive?

Cover me up and bring me to the power

Cover me up and bring me to the power

Cover me up and bring me to the power

All I know is all I want to give you

Cover me up me -? - to the fire

Cover me up get closer to the power

Cover me up get closer to the power

Cover me up get closer now

Cover me up get closer to the power

Got talk got talk

Got talk got talk

Revelation

Got talk revelation

Got got talk got talk

Revelation

If they don't give them the keys

If we don't give them the keys

How are they supposed to be ready?

If we don't give them the keys

How are they to devine?

If we don't give them the keys

How are they supposed to be ready?

If we don't give them the keys

How are they to survive?

Cover me up and bring me to the power

(cover me up get closer to the power)

Cover me up and bring me revelation

If we don't give them the keys

How are they supposed to be ready?

If you don't give them the keys

How are they to survive?

The power of love can open

Every heart in everyone

Minute by minute
