

# You're My Favorite Song

Joe Jonas

Words don't come easy without a melody  
I'm always thinkin'  
In terms of do-re-mi  
I should be hikin', swimmin', laughin' with you  
Instead I'm all out of the tune  
But what you don't know  
You lift me off the ground  
You're inspiration  
You help me find myself  
Just like a bass line in half time  
You hold down the groove  
That's why I'm counting on you  
And if I heard you on the radio  
I'd never want to change a single note  
It's what I'm trying to say all along  
You're my favorite song

I'm in a session writing tracks  
You got another class to teach  
I'm in rehearsal with the band  
You're always one step out of the reach  
I'm looking for some harmony  
With you it comes so naturally  
You help me find the right key  
And when I hear you on the radio  
I never want to change a single note  
It's what I tried to say all along  
You're my favorite song  
(my favorite song)  
And when I hear you on the radio  
I never want to change a single note  
It's what I tried to say all along  
You're my favorite song  
You're my favorite song
