

Divisive (Golden Bug Extended Remix)

We Have Band

I was looking at you
You were looking at me
It was easy to see
That it was one of your lies Is it working for you?
'Cause it's working for me
Let's count to three
No, it's not hard to disguise Was it part of the plan
Taking me by the hand
Being one of the damned
On this merry-go-round? It's not hard to explain
Don't hide your shame
Just play the game
You're one of many we've found Crystal
You take me out this way
You take me out this way
You take me out this way
You take me out this way You take me out this way
You take me out this way
You take me out this way
You take me out I was looking at you
You were looking at me
It was easy to see
That it was one of your lies Is it working for you?
'Cause it's working for me
Let's count to three
No, it's not hard to disguise
