

Away

Mindwalk Blvd

Let them come and find their place
No one will remember
Left alone without a care
Miles away from anywhere

In this veil of light and sky
Bring me to this washed out sight
From this place I thought I knew
You never wanted it as soon

Just take it all
But don't expect to dodge the fall
Your not too late
And I will never leave you away

The echoes of the night
Make up for the fallen flight
I can't have you walk away
But I would see it any day
