We Run

Shawn Mullins

In the town that I was born in
There rides a boy and a girl in love
And the answer came without warning
Just like an angel from Heaven aboveAnd they run down, more land into the neon night
They left the others far behind
But they can make believe it, even if it's for just one night
And if it's only in their minds, when they run
When they run, they run thereIn the look love is familiar
It warms just like the summer rain, oh yes
And one moment falls into forever
We got the power to melt away the painWhen we run down, more land into the neon night
We left the others far behind
But we can make believe it, even if it's for just one night
And it's only in our mindsWhen we run, we lose our way
We run so hard, why don't we stay
And I don't know where we will go to find our wayWhen we run down, more land into the neon night
We left the others far behind, yes we will
We can make believe it, even if it's for just one night
And if it's only in our mindsWe run down, more land into the neon night
We left the others far behind, yes we did
And the land of make believe, seems to be in everybodies sights
But it's only in their minds
So they run, so they run, they run
