

Q (The Best One Of Our Lives)

Evans Blue

Are you saying love or are you saying nothing?
Still life is a crime that I can't ignore
Your perfect ways will follow
The temperature that's rising
All this time you never let me think It was the hardest part to know
It was the fastest we could run
It was the farthest we could go
We are alive, my angel Carcerated, a tougher ending
It sounds so easy
But every time we were supposed to let go
We'd make love
Now, pull me closer after he'd take over Cut me away, cut me away
Don't end it up and
I tried to love you like before
If this was a night
It was the best one of our lives Are you saying now or are you saying never?
The still frame in my mind cannot be ignored
And all I can remember
Is the way you moved your body
And how your lips never said no But it was killing you inside
'Cause you thought I was the one
And now it's out of your control
You have arised my angel Carcerated, a tougher ending
It sounds so easy
But every time we were supposed to let go
We'd make love
Now pull me closer after he'd take over you, you And we're were drawling lines not to cross
So we would never feel a thing
And now it's breaking you apart
Just like it broke your heart Carcerated, a tougher ending
It sounds so easy
But every time we were supposed to let go
We'd make love
Now pull me closer after he'd take over Cut me away, cut me away
Don't end it up and
I tried to love you like before
If this was a night
It was the best one of our lives
