

Play the World (feat. Rumer Willis)

Empire Cast

I might play the world
I might play the world
And I was singing They told me every star's gotta fall but I'm loaded up and ready to shoot
Rather sit around holding up the world, I be strutting in these high heel boots
Not slowing down 'til I make it to the top 'cause this is what I came to do
And if you wait for me to stop, you gon' be sticking to the clock like glue 'Cause I'm the kinda girl that wants
the spotlight and the big dreams
You do it, I can do it better, I can, yeah
When you aim high and you dive deep
There ain't nothing that can measure 'Cause I'ma keep on, keep on giving 'til I get it because I just might play
the world
And I'ma play it 'til I win it 'cause I just might be the girl
To play the world,
I might play the world,
I might play the world
You better have your eyes wide open, there's a lot of you don't wanna see
And there ain't a soul on this earth who gon' tell me what I can and can't be
And I know I'm not like anybody else, but you better get used to me
'Cause if you're not convinced that I'm the best, there's time for me to make you believe 'Cause I'm the kinda
girl that wants the spotlight and the big dreams
You do it, I can do it better, we'll never find nothing better
So move out my way if you're in front of me
Don't ever, ever try to stop me 'Cause I'ma keep on, keep on giving 'til I get it because I just might play the
world
And I'ma play it 'til I win it 'cause I just might be the girl
To play the world,
I might play the world,
I might play the world Don't throw the spotlight and them big ol' dreams, remember me
Know you sitting trying to make up your mind, hurt yourself 'cause I'm bound to make history
And if you don't like me now, then baby, you should hate the girl I'm about to be
I might play the world
'Cause I'ma keep on, keep on giving 'til I get it because I just might play the world
And I'ma play it 'til I win it 'cause I just might be the girl
To play the world,
I might play the world,
I might play the world
