

# Towards the Oldest Silence

## Autumnblaze

Years ago I saw a waveless ocean  
Far and great, beyond everything I knew  
Nights were glowing, the days too long  
For a young man's dreamland and his fancy-song  
We lay together on summer-meadow islands  
Amazing eyes turned towards the oldest silence  
We tried to catch a glimpse of our past  
Our primal sea, so deep and vast  
All I know, a black hole's coming closer  
Hold me on, I fear the nightmare's drowning me  
If I dreamed of my most precious moment  
I would point at the sparkling waveless ocean  
All I know, a black hole's coming closer  
Hold me on, I fear the nightmare's drowning hand  
All I knew, a fever burned within me  
Hold me on, I hope it never comes again
