

# Weather

Amel Larrieux

Whenever you awake and find your kingdom life is great  
May I suggest a simple remedy to make your day  
Open up your windows and then open wide your eyes  
Let the vision feast upon a golden yellow sunrise You might be aching 'cause the one you love is far away  
Thinking it's impossible to make it through another day  
You can feel better take it from me  
Just look at the colors of the fine autumn leaves  
Let them put you at ease As long as we have the weather  
The dark skies will find us  
Will send the clear day to remind us  
As long as we have the weather  
The sunlight will guide us  
And the rain most surely will find us God created change in seasons not in vain  
The beauty of the weather's here  
For sum distraction from our pain  
Let the warm summers night mist you  
Let a winter snow fall entrance you  
You don't have to pay nothing to take in the view Let the winter winds blow your pain away  
Let the blue skies be your secret get-away  
I got the anecdote to keep you cool  
You should loosen up because nature has no rules As long as we have the weather  
The dark skies will find us  
Will send the clear day to remind us  
As long as we have the weather  
The sunlight will guide us  
And the rain most surely will find us As long as we have the weather  
The dark skies will find us  
Send the clear day to remind us  
As long as we have the weather  
The sunlight will guide us Let the winter winds blow your pain away  
Let the blue skies be your secret get-away  
I got the anecdote to keep you cool  
You should loosen up because  
You know that nature has no rules As long as we have the weather  
The dark skies will find us  
Will send the clear day to remind us  
The sunlight will guide us  
And the rain most surely gonna find us The dark skies will find us  
Send the clear day to remind us

The sunlight will guide us away As long as we have the weather  
We gonna, we gonna sit around  
Oh yeah, oh yeah yeah, oh oh yeah yeah  
As long as we have the weather As long as we have  
As long as we have the weather  
As long as we have the weather  
As long as we have the weather  
The weather, the weather, the weather  
Yeah, yeah, yeah, yeah, yeah, yeah
