

Rainbow

Burton Gaar

took while to realize this road was rough
then i found out it can take your soul if you're not loved
I've been down on both my knees cause this old road does what it pleases
and I've got scars from being pushed and shoved

it never crossed my mind i wouldn't get there
but the streets got mean and the lights began to fade
all those iou's i thought i might redeem
came back as useless as the promises they made

there aint no rain to this rainbow
and i'm trying to find a place where it came down
there ain't no rain to this rainbow
i guess I've always known it can't be found

i burn my candle at both ends
but i burned myself so bad i had to quit
i was raised up with the blues
left with gifts and a few good tunes
I've got mine if this is all i need

there aint no rain to this rainbow
and i'm trying to find a place where it came down
there ain't no rain to this rainbow
i guess I've always known it can't be found

solo

there aint no rain to this rainbow
and i'm trying to find a place where it came down
there ain't no rain to this rainbow
i guess I've always known it can't be found

there aint no rain to this rainbow
and i'm trying to find a place where it came down
there ain't no rain to this rainbow
i guess I've always known it can't be found

there aint no rain to this rainbow

and i'm trying to find a place where it came down
there ain't no rain to this rainbow
i guess I've always known it can't be found
