

# Icarus With You

## Celestial Season

and now I fly closer  
a million miles ahead and I keep falling, all over  
the day slides like an orange glow in hell  
but I can't tell  
and you're near now, I want this, near me in my life  
but we can't take this for answers and tomorrow for me and her to say: "We're in heaven now"  
we're in heaven now  
falling from above, we're in heaven now  
my wings will carry you away together but alone, we're in in heaven now  
everything is gone, we're in heaven now  
we're in heaven now  
golden feathers fade away we didn't even try, we're gonna stay up late  
we didn't even try, before the night gets on it's way
