

# Seasons

## Sevendust

Do you feel the walls come down  
Everywhere you stand?  
Do you think that you fill the void  
And escape the world with something?  
(Everytime, everytime, everytime, everytime, everytime)Everytime the truth gets broken  
I'm the one to fix it  
All the hate don't mean  
If you're not here to spit itThe fear that haunts us all  
The beginning of the end, of the end  
The season is way too cold  
Will we last another year, another year?You kill yourself  
Everyday you turn away  
(Suffocate, separate)  
To face it all  
Would you save us from ourselves, save us from ourselves?Everytime the truth gets broken  
I'm the one to fix it  
All the hate don't mean  
If you're not here to spit itThe fear that haunts us all  
The beginning of the end, of the end  
The season is way too cold  
Will we last another year, another year?Everytime the truth gets broken  
Everytime the truth gets broken  
Everytime, everytime  
Everytime, everytime, everytimeThe fear that haunts us all  
The beginning of the end, of the end  
The season is way too cold  
Will we last another year, another year?The fear that haunts us all  
The beginning of the end, of the end  
The season is way too cold  
Will we last another year, another year?Everytime the truth gets broken  
Everytime the truth gets broken  
Everytime the truth gets broken  
Everytime the truth gets broken  
Everytime, everytime  
Everytime, everytime, everytime
