

Smack You

Kimberly Cole

Shut up
Nobody cares what you have to say
Shut up
Nobody's listening to you anyway
You got your eye liner done wrong
Fake nails too long
Fingers all up in my face
Trying to put me in my place
And you
Think you
Can just say what you wanna
But tonight I'm gonna gonna
Smack you
Right across your lips
Gonna lose your lipstick
Cause you keep on talkin' shit
I'm gonna kick you
Right between your hips
Cause you're such a catty bitch
And for me it's such a switch
Cause I'm usually such a lady
But tonight I'm gonna smack a bitch
Bitch (Repeat x17)
Speak up
I know it's hard to talk with swollen lips
Now get up
Oh wait
Let me take my heels out from between your hips
You got your eye liner done wrong
Fake nails too long
Fingers all up in my face
Trying to put me in my place
And you
Think you
Can just say what you wanna
But tonight I'm gonna
Smack you
Right across your lips
Gonna lose your lipstick

Cause you keep on talkin' shit
I'm gonna kick you
Right between the hips
Cause you're such a catty bitch
And for me it's such a switch
Cause I'm usually such a lady
But tonight I'm gonna smack a bitch
Tonight I'm gonna smack a bitch
Bitch (Repeat x17)
Sticks and stones, they have their place
When words don't work and you can't walk away
You brought-out a side of me that I don't like
I bet next time you'll think twice
But tonight I'm gonna smack a bitch
I'm gonna hit you
Right across your lips
Gonna lose your lipstick
Cause you keep on talkin' shit
I'm gonna kick you
Right between the hips
Cause you're such a catty bitch
And for me it's such a switch
I'm gonna smack you
Right across your lips
Gonna lose your lipstick
Cause you keep on talkin' shit
I'm gonna kick you
Right between the hips
Cause you're such a catty bitch
And for me it's such a switch
Cause I'm usually such a lady
But tonight I'm gonna smack a bitch

Shut up
Nobody cares what you have to say
Shut up
Nobody's listening to you anyway
You got your eye liner done wrong
Fake nails too long
Fingers all up in my face
Trying to put me in my place
And you
