

Future Rhythm

Digital Underground

Hit 'em with the rhythm of the future
Hit 'em with the rhythm of the future
Hit 'em with the rhythm of the futureIn the future, it's gonna be a rhythm divine
A paradise peace of mind vibe for every kind
Text to the sexless, dollars to the needy
Power to the people but death to the greedyIn the future, there's gonna be a new drug
To keep the people sleep deep on the streets strung up
It keeps you lifted longer, we be faxing freaks through that internet
Hold on, I think I got 2 new females in my e-mailThey told me unity was not at home but they lied
I seen them with my TV screen phoneIn the future, I tap through the web online
Find time to program a freak the way I program the beats
Tweak the eats, ni son chi, now ladies speak your speech
Hella sweet but kinda salty your ballsIn the future, now that's what I'm talkin' 'bout
Got me this hard, dry swollen, out of control
Bow to the audience, collect your chips and switch your clips
And leave the scene with the green, we give them future rhythmMoses knows this so he flows prophesy for the
future
They're making microchips for your toes
And the nose knows those that goes
Against the flow of mother nature, you're breaking up the showLouie Louie, yes we received your fax
It said to have each others' backsIn the future, no imitation G's flexing tecs in the hood
Bravery turned sweetery, 150 turns on their streeterly
Warriors who blast passed what they can't do
It's how we're hitting 'em in the future rhythmIn the future, we'll still be getting lifted
The gifted will rise, no lies from the higher-ups
Power shifted, wine and [Incomprehensible] ain't gon' be the pride
Of brown town, less stress and desperation in our eyes, eyes, eyesHit 'em with the rhythm of the future
Baby, let me play with you
Hit 'em with the rhythm of the future
Come on, baby, let me play with youHit 'em with the rhythm of the future
Hit 'em with the rhythm of the future
Come on, baby, let me play with youHit 'em with the rhythm of the future
Come on, baby, let me play with you
Hit 'em with the rhythm of the future
Come on, baby, let me play with you
