Light

Ben Lee

You were the one that brings the weather
You were a dream I've had forever
You know exactly what I'm wishing
You're gonna love me in to submissionFeelings I had while at your feet
Those kinds of things I can't repeat
You're gonna fill the world with lightYou put the point in exclamation
You took a day to build a nation
You're gonna teach me how to live
You're gonna teach me how to giveFeelings I had, well, who could say?
I can't explain them anyway
You're gonna fill their world with light
You're gonna fill their world with light
