

The Best Part (Interlude)

Meghan Trainor

Look into your soul eyes
Prying, dying to know why I feel so whole
When you leave, the sun goes
So take my heart with you now
No need to say what I know
Just be with me

Your love is the best part, love is the best part
Your love is the best part, love is the best part
Even if it all falls apart
Your love is the best part, love is the best part
