Brightside

The Knocks

Sing it with me one more timeWe've been working overtime
Looking for the active life
But something's got you feeling fine
This melody's been on your mindSing it with me one more time
And we all wanna make it to the bright side
So come on, and sing it with me one more time
And we all wanna make it to the bright side
So come on, and sing it with me one more time(?) and full of light
Through danger zones and fearless flights
Trying to go with no end in sight
A melody that makes it rightSing it with me one more time
[repeat until end]And we all wanna make it to the bright side
So come on and sing it with me one more time
