

# Brightside

## The Knocks

Sing it with me one more time We've been working overtime  
Looking for the active life  
But something's got you feeling fine  
This melody's been on your mind Sing it with me one more time  
And we all wanna make it to the bright side  
So come on, and sing it with me one more time  
And we all wanna make it to the bright side  
So come on, and sing it with me one more time(?) and full of light  
Through danger zones and fearless flights  
Trying to go with no end in sight  
A melody that makes it right Sing it with me one more time  
[repeat until end] And we all wanna make it to the bright side  
So come on and sing it with me one more time
