

During The Storm

Pete Francis

When the sun shine brings a new day
And your rainbow starts to appear
Let us take you far far away from here
Girl rest your eyes, I'll watch you
Don't worry none, I'll keep you safe
Keep you safe, safe, keep you safe
And every waking moment
I'll pray the sun adorns your face, your face
In the stormy days of life, I'll be the light, so hold on
To guide you through the night, just be patient
Can we spend our nights alone with thoughts of paradise only
To be with you my love, forever
During the storm, during the storm
Don't let the rain drops fall upon your face
During the storm, during the storm
Don't let the rain drops fall upon your face

As things go by, I'll stay by your side
Your love I need, it cannot be denied, no no
Through the years, untested waters
Girl just come with me to another place
In the stormy days of life, I'll be the light, so hold on
To guide you through the night, just be patient
Can we spend our nights alone with thoughts of paradise only
To be with you my love, forever
During the storm, during the storm, during the storm
(Don't let the rain drops fall upon your face)
During the storm, during the storm
During the storm, during the storm
(Don't let the rain drops fall upon your face)
During the storm, during the storm
During the storm, during the storm
Don't let the rain drops
