

# Winter Sound

## Of Monsters and Men

Stop  
You're cold against the skin  
You take me in your arms  
When walls are closing in And I run I run I run  
Awakening my heart  
But you overwhelm my lungs  
And it's tearing me apart You and I will not be shaken  
By the winter sound  
But my voice is suffocating  
In the winter sound Stop  
I will take control  
Bend the metal  
Into shapes that I know And I run I run I run  
Further than before  
I shake away the skin  
To saturate my soul You and I will not be shaken  
By the winter sound  
But my voice is suffocating  
In the winter sound You scream, you scratch, you bite  
You pray on my heart  
And I know that you and I  
Can never be apart
