

# Never

## Tom Jones

From the first time that I heard you I knew  
I'd be hooked on you forever like the blues  
People told me you would hurt me, so untrue  
'Cause after all these years, you're the one thing that's still here  
'Cause of you there's no alone, you've been with me through it all  
Never, never, never, never gonna give you up  
Running through my blood  
Never, never, never leaving you behind  
Always on my mind  
Can't get enough of your highs and your lows  
You take me places where nobody goes  
And if you went away, I would never be the same  
Oh, your sweetness is like sugar on my lips  
When you're not around it's your melody that I miss  
Like an old friend you come back to me so quick  
And after all this time I've still got you in my life  
You and me we're going strong, you and me we still belong  
Never, never, never gonna give you up  
Running through my blood  
Never, never, never leaving you behind  
Always on my mind  
Can't get enough of your highs and your lows  
You take me places where nobody goes  
And if you went away, I would never be the same  
(Never, never, never, never)Never, never, never, never gonna give you up  
Running through my blood  
Never, never, never leaving you behind  
Always on my mind  
Can't get enough of your highs and your lows  
You take me places where nobody goes  
And if you went away, I would never be the same  
(Never, never, never, never)
