

Dream Warriors (Remix by Nick BZ)

Harlee

Dream dream dream warriors We on the nighlife under the spotlight
Here, it the highlight warriors
Under the moonlight we light up the night sky Dancing til daylight warriors
Better dream better speak better learn better think
Do you dare to conquer?
Better do, better be better learn How to dream
What's your dream? What's your dream? Warriors! left you up! we left you up!
Under the street lights we only do what's right
Bring guns to a night fight We warriors!
G6 is what we fly
Masseuse through the blue sky
what it sound like when doves cry We warriors! Better dream better speak better learn better think
Do you dare to conquer?
Better do, better be better learn How to dream
What's your dream? What's your dream?
