

Civil War

Motorhead

White noise is coming
The wolf at your door
Do you hear the drummin'?
Outside your window, outside your window Civil war, civil war
All your yesterday's gone before
Civil war, civil war
Can you tell me what you're fighting for? Soldiers of Fortune
The traitor within
Blood on the pale moon
Outside your window, outside your window, hey Civil war, civil war
All your yesterday's gone before
Civil war, civil war
Can you tell me what you're fighting for? Children learn to kill
Bet your ass you'll pay the bill
Season of the dog
The dollar takes the place of God Death laughs in your face
Anarchy will take your place
You give all your children guns
See what you have done
Backlash coming soon
Joker gonna call the tune Your children are learning
You teach them to hate
Your cities are burning
Outside your window, outside your window Civil war, civil war
All your yesterday's gone before
Civil war, civil war
Can you tell me what you're fighting for? Civil war, civil war
Can you tell me what you're fighting for?
Civil war, civil war
Every campaign even in the star
