

# Love Is an Animal

Wes Carr

When this night has only two faces  
I'm the monster she's my prey  
Could pick her up and take her to places  
Could show her what love is today And the walls have ears but they don't have eyes  
So you do not have to dress in disguise  
And the doors have mouths but they do not listen  
They seem to bite you when you're not welcome You know love is an animal  
You know love is an animal  
And you're all just insatiable  
You know love is an animal When this night has only two footsteps  
She's a killer I'm her prey  
So forever there'll be two footsteps  
Here i am just walking away And the walls have ears but they don't have eyes  
So you do not have to dress in disguise  
And the doors have mouths but they do not listen  
They seem to bite you when you're not welcome You know love is an animal  
You know love is an animal  
And you're all just insatiable  
You know love is an animal You know love is an animal  
You know love is an animal  
And you're all just insatiable  
You know love is an animal In this light there's only one shadow  
In the dark i make my way  
So forever there'll be one shadow  
I've gone in deeper it's too late And the walls have ears but they don't have eyes  
So you do not have to dress in disguise  
And the doors have mouths but they do not listen  
They seem to bite you when you're not welcome You know love is an animal  
You know love is an animal  
And you're all just insatiable  
You know love is an animal You know love is an animal  
You know love is an animal  
And you're all just insatiable  
You know love is an animal
