

# Through It All

## Spoken

(Verse)

I saw the storm felt the wind began to change  
I saw the sky rip wide open  
I looked away hid my face from the world  
Ran away from everything  
But now I'm back for more I heard the sounds of a flashing light  
Watched the day turn into night  
I heard the sounds of a flashing light  
Watched the day turn into night (Chorus)  
And through it all  
We've been thrown into the fire  
We've been lost in the flame  
But we will rise from the ashes again  
Our worlds have been broken  
We've been burned by the flame  
But we will rise from the ashes again (Verse)  
She watched the world as it slowly slipped away  
Lost all the dreams in the ocean  
She sees his face, feels his touch on her hand  
Remembers when she had everything  
One day she will again I heard the sounds of a flashing light  
Watched the day turn into night (Chorus)  
And through it all  
We've been thrown into the fire  
We've been lost in the flame  
But we will rise from the ashes again  
Our worlds have been broken  
We've been burned by the flame  
But we will rise from the ashes again (Bridge) x2  
You are all that I have  
Everything that I need  
You're the one that I want  
You're everything I believe (Chorus)  
And through it all  
We've been thrown into the fire  
We've been lost in the flame  
But we will rise from the ashes again  
Our worlds have been broken  
We've been burned by the flame

But we will rise from the ashes again
