Satellite

Pigface

White lightning man
Kill the night
Bring the light for those who need to hide
When your glowing known he stills the cold
In psychic heat begin to fall apart
Commit some social suicide
You can run but never hide away
Kill the night!
Arrogant boy, reduced to tears
Cross-sect the stratosphere
Kill the night!
Concsiousness unconciousness
Does this releive the knotted breast
Bring the night!
Satellite!
Kill the night!
Sshh, you'll kill the night, hide the light...
