

# Satellite

## Pigface

White lightning man  
Kill the night  
Bring the light for those who need to hide  
When your glowing known he stills the cold  
In psychic heat begin to fall apart  
Commit some social suicide  
You can run but never hide away  
Kill the night!  
Arrogant boy, reduced to tears  
Cross-sect the stratosphere  
Kill the night!  
Consciousness unconciousness  
Does this releive the knotted breast  
Bring the night!  
Satellite!  
Kill the night!  
Sshh, you'll kill the night, hide the light...
