First Things First (Acoustic)

Sense Field

Tell me the first thing you feel
When you're taking in air
Tell me the first thing you feel
When your body could care less
About the time of day
About what people say
Tell me the first thing you feel
After you close your eyesDo you recognize
The voice that's been telling you all this time
He's been watching over you
Listening to every single word
Thinking out everything
Do you realize
He's been watching over you
Listening to every single song
Singing out everything
Everything... (x3)
Tell me the first thing you feel
When I reach to touch you
Tell me the first thing you feel
When you smile and you cryDo you recognize
The voice that's been telling you all this time
He's been watching over you
Listening to every single word
Thinking out everything
Do you realize
He's been watching over you
Listening to every single song
Singing out everything
