

This Time

Avant

I've been tripping on you, babe
I can't find the right words to say
'Cause I can't believe what you done to me
Been giving up my body
You thought I would never find out
You got my mind in a daze
But you can do your thang, baby
I'm getting outta your way
This time I'm gonna tell her goodbye
No more her in my life
No more lies, think it's time that I fly
Leave my troubles behind
Gonna leave it all behind me
I started to call on you
When I came in from outta town
'Cause your girl put me down
That, that you was sleeping around
I asked you, "Where you've been?"
You said, "I was with my friends"
But you, you were on Woodland
Yes and freaking your one-ten
Feel so phony
Here I'm pulling, girl

Oh, girl

This time I'm gonna tell her goodbye
No more her in my life
I'm sick of what you're doing to me, baby
No more lies, think it's time that I fly
Leave my troubles behind, baby, yeah, yeah
Six the morning, had to start jumping
Rubbin' your body tight all through the night
That's when you said those words to me
You said, "I love you, babe and don't leave"
Five in the evening, you started scheming
I saw you creep, didn't know that I was peeping
Told me that you was sleeping
I'm not believing what I'm seeing
This time I'm gonna tell her goodbye

No more her in my life
No more lies think it's time that I fly
Leave my troubles behind
This time I'm gonna tell her goodbye
No more her in my life
No more lies, think it's time that I fly
