Beauty of the Ride

Sebadoh

Never did and never will
Its just the way its always been
Ive made mistakes before
Ill make the same againAnd all this tension we ignore
Surely works its ugly way insideI have known that nothings fair
Surely what did I expect?
When magic slips into the air
And everydays another testAnd all this tension we ignore
It surely works its ugly way outsideSo let it build, let it explode
Leaving blood and shattered boneOr bite your tongue
Till youve forgotten what to say
And take another step back
Until you find youve walked awaySilence like disease
But I dare not say it hurts
Cause if I honestly react
Nothings ever gonna workAll this tension back and forth
Its just the beauty of the ride
Its just the beauty of the rideSo let it build, let it explode
Leaving blood and shattered boneOr bite your tongue
Till youve forgotten what to say
And take another step back
Until you find youve walked away
