

No Gravity

Gridlok

La la

I ride through the galaxies, crossing infinity

Heaven is coming down, I'm guided by satellites,

I see the flashing lights. Its just a deafening sound.

Theres nothing but silence and nothing that makes sense, here without you,

I have to confess this you make me weightless, you are my ray of light, like im in space without a shuttle,

Im walking on thin air in a bubble,

Gotta get past the final level,

Cause im floating around and I cant feel the ground.

La la

No Gravity

la la

No Gravity

I'm lost on the milky way, you're light years away from me, I wish on a shooting star,

I try to breath again, I cant get no oxygen, I dont think I get to far.

Theres nothing but silence and nothing that makes sense,

Here without you, I have to confess this you make me weightless, you are my ray of light,

Like im in space without a shuttle,

Im walking on thin air in a bubble,

Gotta get past the final level,

Cause im floating around and I cant feel the ground.

La la

No Gravity

la la

No Gravity

Ive been hit by a meteor, or at least thats how it hurts

La la

No Gravity

la la

Like im in space without a shuttle,

Im walking on thin air in a bubble,

Gotta get past the final level,

Cause im floating around and I cant feel the ground.

La la

No Gravity

Cause I'm floating around and I can't feel the ground

La la

No Gravity
