Knee Deep

Big Wreck

Knee DeepMake love by the window
With the toffs
Before you can jump
I'll push you off

And I'm knee deep with no sleep at all

When you're on my shoulder

I'm knee deep and I can't sleep it offClench my fists

Bite my lip

'Til it goes away

And all this blood

And all these days

Dry up and blow awayLook over yonder in my past

Everything good will always pass

And I'm knee deep with no sense at all

When you're on my shoulder

I'm knee deep and I can't kiss it offClench my fists

Bite my lip

'Til it goes away

Madness comes

It always does

And always finds a waySadness comes

And always finds a wayUnderstand

And reprimand

When you're on my shoulder

But you'll always fly

Always fly away

Ya awayClench my fists

Bite my lip

Til it kills the pain

And all this blood

All these days

Dry up and blow awayAll my past

All my hate

Always finds a wayAlways finds

Always finds a way
