Take Me Along

Callenish Circle

And why can't you wait a little longer You don't want to leave this soon There's one thing I want you to know Give me some time before you go My ears cannot stand this silence Please say my name one more time My eyes cannot stand the light So fragile how can you cry How can you see My ears cannot stand this silence now Say my name one more time My eyes cannot stand the light So fragile how can you cry with a smile Can't you wait a little longer You don't want to leave this soon There's one thing I want you to know Give me some time to explain Listen to me before you go Take me along as you sit here all alone Getting to know myself I do not care about the birds Nor about the sun I know it is not your choice I know it's not your fault That you'll be gone So take me along now Together we cry As we see the end coming near Your tired eyes feel my fear Feel my fear again
